

APPENDIX

*One hour of life, crowded to the full with glorious action,
and filled with noble risks, is worth whole years of those
mean observances of paltry decorum, in which men steal
through existence, like sluggish waters through a marsh,
without either honor or observation.*

— Sir Walter Scott

APPENDIX

POPULATION, LOUISIANA AND ST. MARY, 1997

Population numbers are taken from the 1997 Census estimates. All rates for 1997 are calculated based on these population estimates, unless otherwise noted. Racial classifications are white, African American and other.

Population, Louisiana, 1997
Race, Gender and Ages 0 - 49

AGE	0-4	5-9	10-14	15-19	20-24	25-29	30-34	35-39	40-44	45-49
White Males	92,464	95,806	101,082	109,796	99,896	98,344	102,700	118,456	117,760	102,707

FAMILY HEALTH

Prenatal Care

The term, “percent adequate prenatal care” is percent of live births care within the first trimester and a schedule of care throughout the pregnancy. Calculations are based on information on the birth certificate.

Low and very low birthweight

Percent of calendar-year live births at or below 2500 grams (low birthweight - 5 pounds 8 ounces or 5.5 lbs.) and at or below 1500 grams (very low birthweight - 3 pounds 5 ounces or 3.3 lbs.).

Births to teens

Births to teens is calculated as a percent of live births to mothers of a certain age (usually below 20).

Births, Louisiana and St. Mary, 1997 Race of Mother by Characteristics of Birth*				
	Total Births	% adequate prenatal care**	% low birthweight	% of live births to mothers under age 20
Louisiana	65,947	75.4%	9.8%	18.5%
White	37,438	84.3%	6.7%	13.4%
African American	27,115	63.3%	14.1%	26.0%
Other	1,394	74.4%	7.1%	11.0%
St. Mary	887	75.7%	9.2%	22.1%
White	504	84.3%	6.3%	19.2%
African American	364	64.0%	13.8%	26.6%
Other	19	73.7%	5.1%	10.5%

Infant Mortality Rate

Infant mortality rate is the number of deaths to infants under one year of age, per 1,000 live births in a year. The neonatal mortality rate is the number of deaths to infants under 28 days of age, per 1,000 live births in a year.

Maternal mortality

In 1997, fewer than five women in Louisiana died in childbirth. There was no reported maternal mortality in St. Mary Parish.

APPENDIX

Genetic Disease in Newborns Louisiana and St. Mary, 1997

Disease	Louisiana	St. Mary
Congenital Hypothyroidism	8	0
PKU	*	0
Sickle-cell	100	0

* fewer than five cases are not reported for reasons of confidentiality

Source: Genetic Disease Program, DHH-OPH, 1998.

Congenital Hypothyroidism

Hypothyroidism is caused by the failure of the thyroid gland to develop. Infants who are not treated will suffer severe brain damage. If treated promptly, infants will develop normally.

Phenylketonuria (PKU)

PKU is a genetic disorder caused by the lack of a specific enzyme responsible for breaking down the amino acid phenylalanine. PKU can cause brain damage and mental retardation. Early detection and treatment can prevent or reduce brain damage.

Sickle cell disease

Sickle cell disease is an inherited disorder of red blood cells. Patients with this disorder suffer life-

long anemia and painful obstructions of small blood vessels. Early recognition and urgent management of infections can reduce the risk of death in the first year of life.

Injury-related Deaths by Cause and Gender, Louisiana, 1997 N=3118

Cause	Gender				Total	
	Male Number	Rate	Female Number	Rate	Number	Rate

Conditions or Events that are Reportable to the Office of Public Health

"It is hereby made the duty of every physician practicing medicine in the State of Louisiana to report to the State Health Officer, through the Health Unit of the parish or municipality wherein such physician practices, any case or suspected case of reportable disease which he is attending, or has examined, or for which such physician has prescribed. The report shall be made promptly at the time the physician first visits, examines or prescribes for the patient, and such report shall state the name, age, sex, race, usual residence, place where the patient is to be found, the nature of the disease and the date of onset." (Sanitary Code, State of Louisiana: Chapter 2, Sec. 2:004; Rev. 3-84) In addition to physician reporting, laboratories are required to report the results of tests which either confirm or suggest the occurrence of reportable diseases as specified by law. Additionally, Sec. 2:006 states "It shall be the duty of every osteopath, coroner, medical examiner, dentist, homeopath, infection control practitioner, medical records director, nurse, nurse midwife, nurse practitioner, pharmacist, physician assistant, podiatrist, social worker, veterinarian, and any other health care professional to report a confirmed case of reportable disease as specified in Section 2:003 in which he or she has examined or evaluated, or for which he or she is attending or has knowledge."

REPORTABLE COMMUNICABLE DISEASES

Acquired Immune Deficiency Syndrome (AIDS)	Legionellosis	Tuberculosis ⁴
Amebiasis	Lyme Disease	Typhoid fever
Arthropod-borne encephalitis (Specify type)	Lymphogranuloma venereum ²	Varicella (chickenpox)
Blastomycosis	Malaria	Vibrio infections (excluding cholera) ¹
Botulism ¹	Measles (rubeola) ¹	
Campylobacteriosis	Meningitis, other bacterial or fungal	
Chancroid ²	Mumps	
Chlamydial infection ²	Mycobacteriosis, atypical ⁴	
Cholera ¹	Neisseria meningitidis infection ¹	
Cryptosporidiosis	Pertussis	
Diphtheria	Rabies (animal & human)	
Enterococcus (infection; resistant to vancomycin)	Rocky Mountain Spotted Fever (RMSF)	
Escherichia coli 0157:H7 infection	Rubella (German measles)	
Gonorrhea ²	Rubella (congenital syndrome)	
Haemophilus influenzae infection ¹	Salmonellosis	
Hemolytic-Uremic Syndrome	Shigellosis	
Hepatitis, Acute (A, B, C, Other)	Staphylococcus aureus (infection; resistant to methicillin/oxacillin or vancomycin)	
Hepatitis B carriage in pregnancy	Streptococcus pneumoniae (infection; resistant to penicillin)	
Herpes (neonatal)	Syphilis ²	
Human Immunodeficiency Virus (HIV) infection ³	Tetanus	

All reportable diseases and conditions other than the venereal diseases, tuberculosis and those conditions with (*) should be reported on an EPI-2430 card and forwarded to the local parish health unit or the Epidemiology Section
P.O. Box 60630
New Orleans, LA 70160
504-568-5005 or
1-800-256-2748 or
504-568-5006 fax.
All facsimile transmissions are considered as part of the confidential disease case report, and as such, are not subject to disclosure.

¹ Report suspected cases immediately by telephone. In addition, all cases of rare or exotic communicable diseases and all outbreaks shall be reported.

² Report on STD-43 form. Report cases of syphilis with active lesions by telephone.

³ Report on EPI-2430 card. Name and street address are optional but city and ZIP code must be recorded.

⁴ Report on CDC 72.5 (f. 5.2431) card.

Other Reportable Conditions

Cancer
Complications of abortion
Congenital hypothyroidism*
Galactosemia*
Hemophilia*
Lead Poisoning
Phenylketonuria*
Reye's Syndrome
Severe traumatic head injury**
Severe under nutrition (severe anemia, failure to thrive)
Sickle cell disease (newborns)*
Spinal cord injury**
Sudden infant death syndrome (SIDS)

* Report to the Louisiana Genetic Diseases Program Office by telephone 504-568-5070 or FAX 504-568-7722.

** Report on DDP-3 form; preliminary phone report from ER encouraged 504-568-2509.
